

VPN CONFIG. SETTING

BY : MOHIT KUMAR - IT

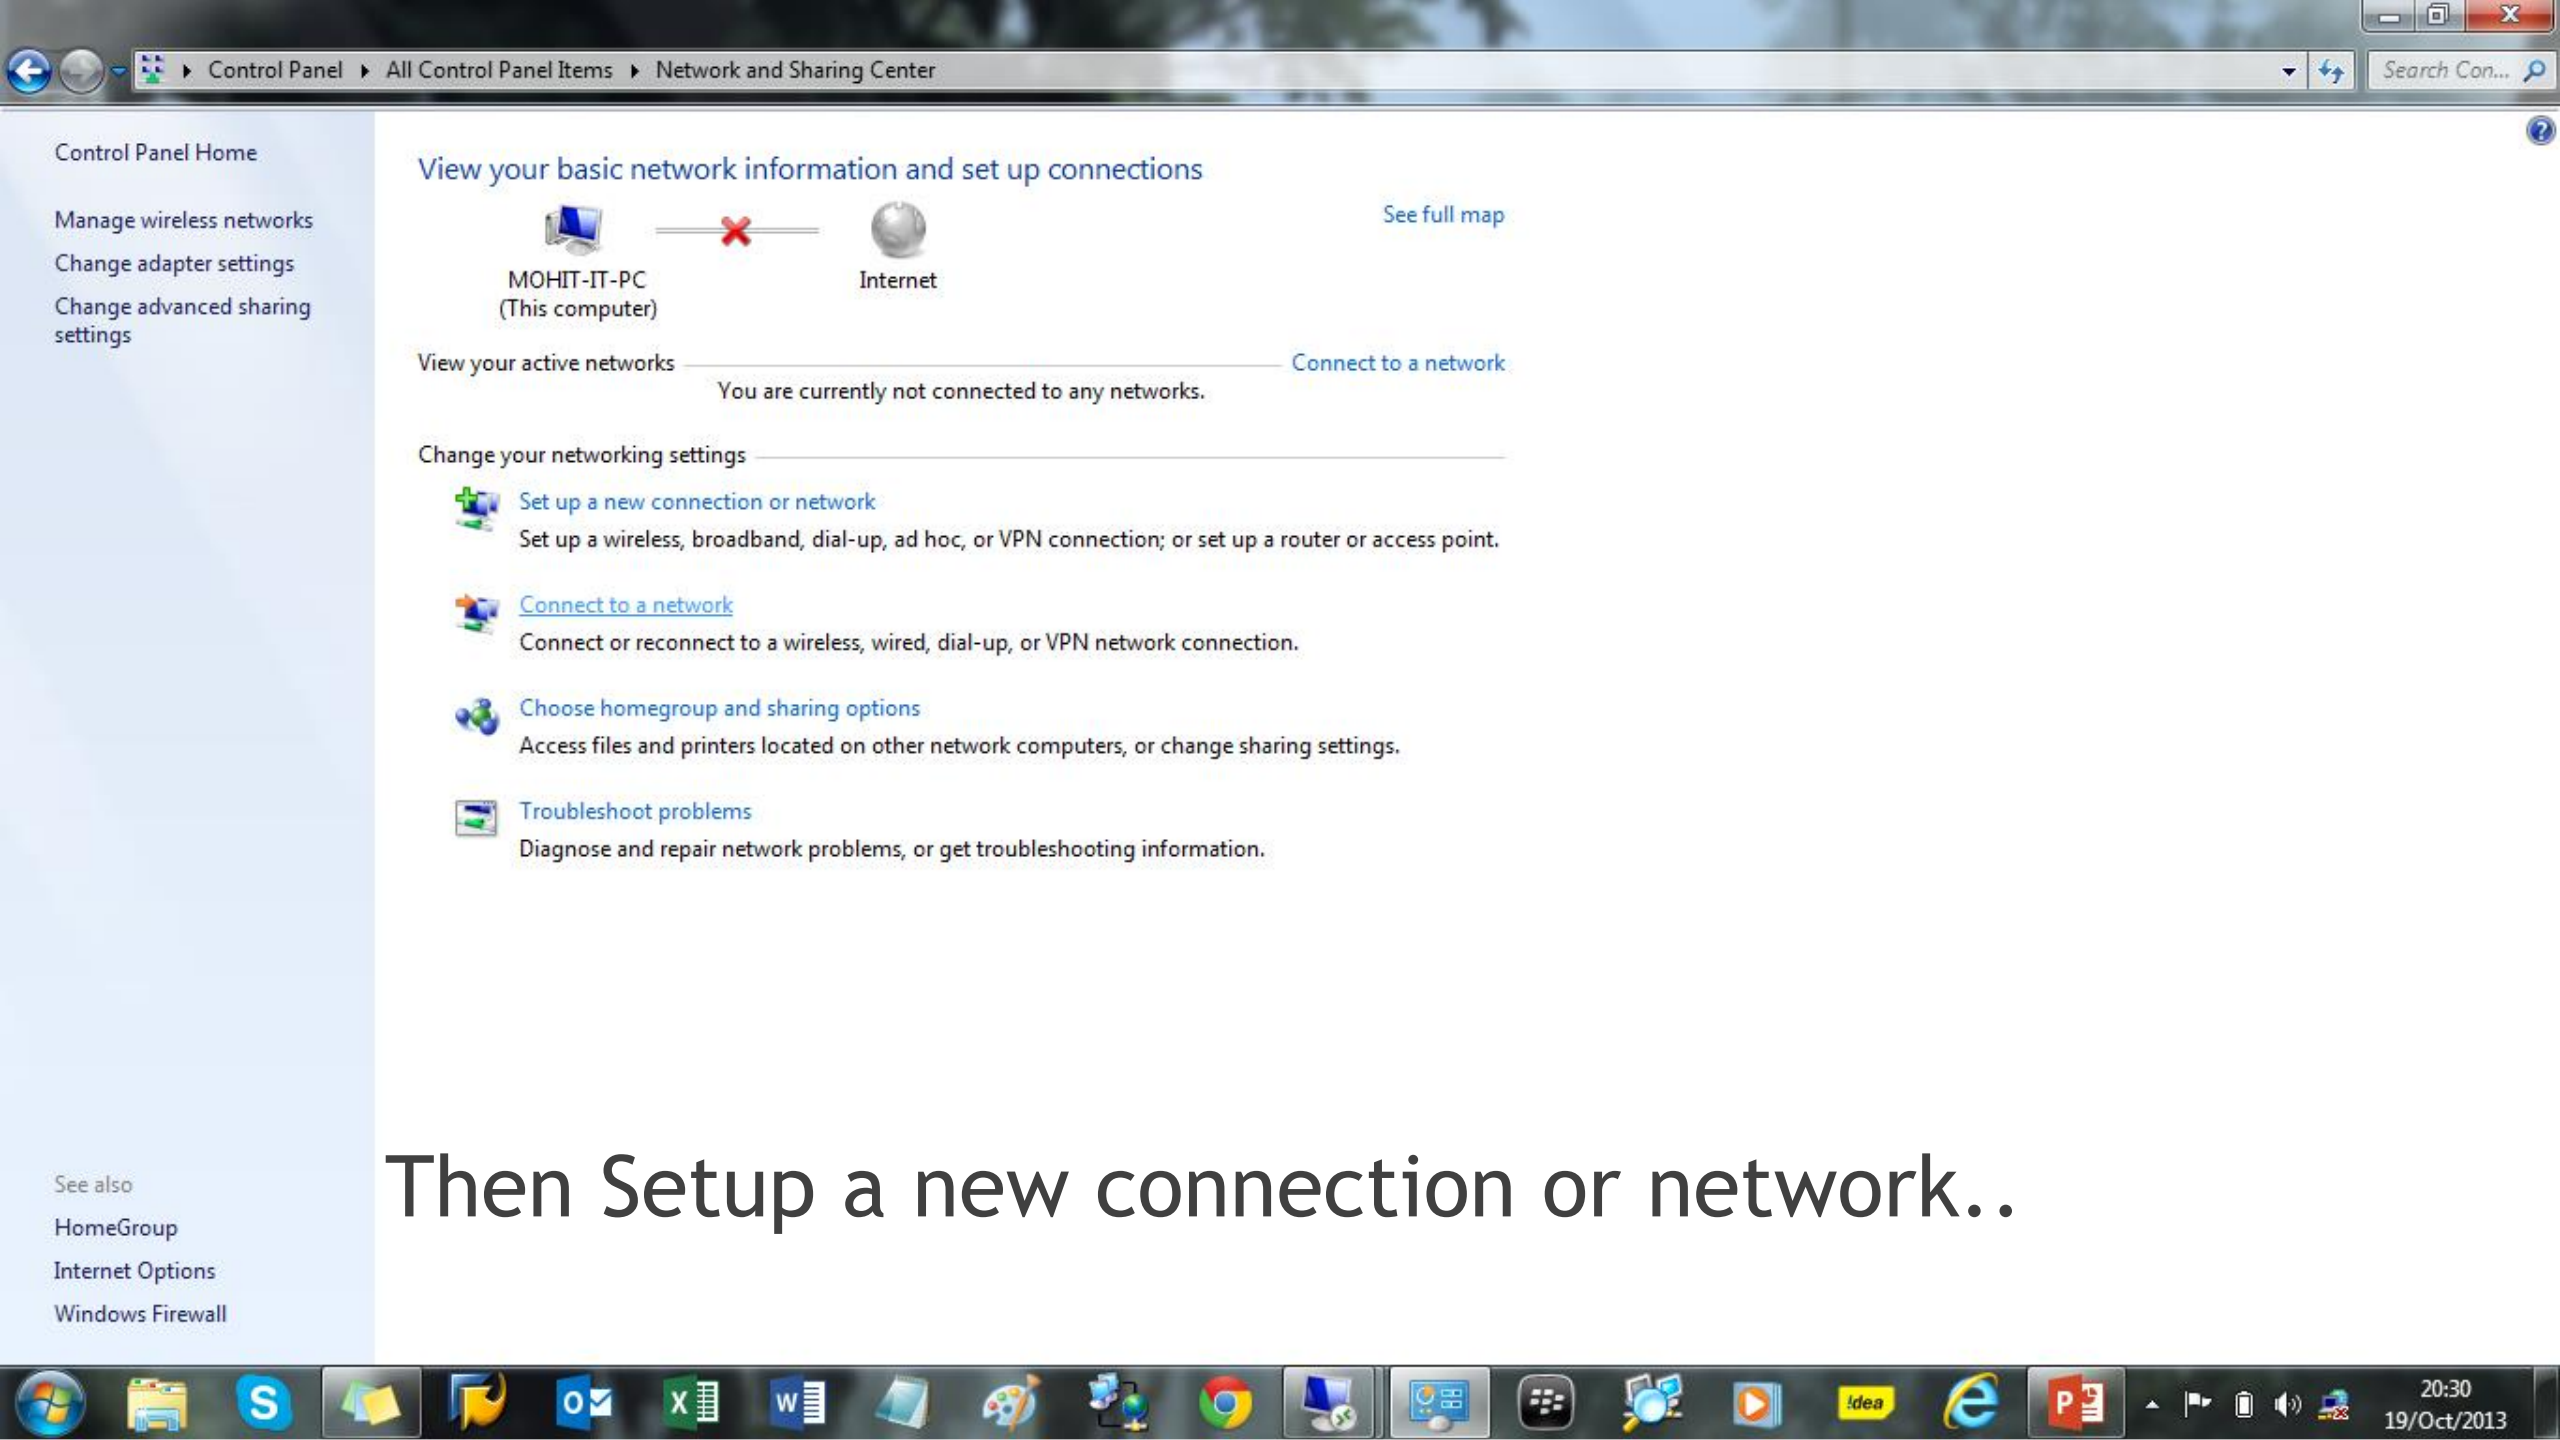

CLICK ON CONTROL PANEL.

Then Network and Sharing center..

View your basic network information and set up connections

[See full map](#)

View your active networks [Connect to a network](#)
You are currently not connected to any networks.

Change your networking settings

 [Set up a new connection or network](#)
Set up a wireless, broadband, dial-up, ad hoc, or VPN connection; or set up a router or access point.

 [Connect to a network](#)
Connect or reconnect to a wireless, wired, dial-up, or VPN network connection.

 [Choose homegroup and sharing options](#)
Access files and printers located on other network computers, or change sharing settings.

 [Troubleshoot problems](#)
Diagnose and repair network problems, or get troubleshooting information.

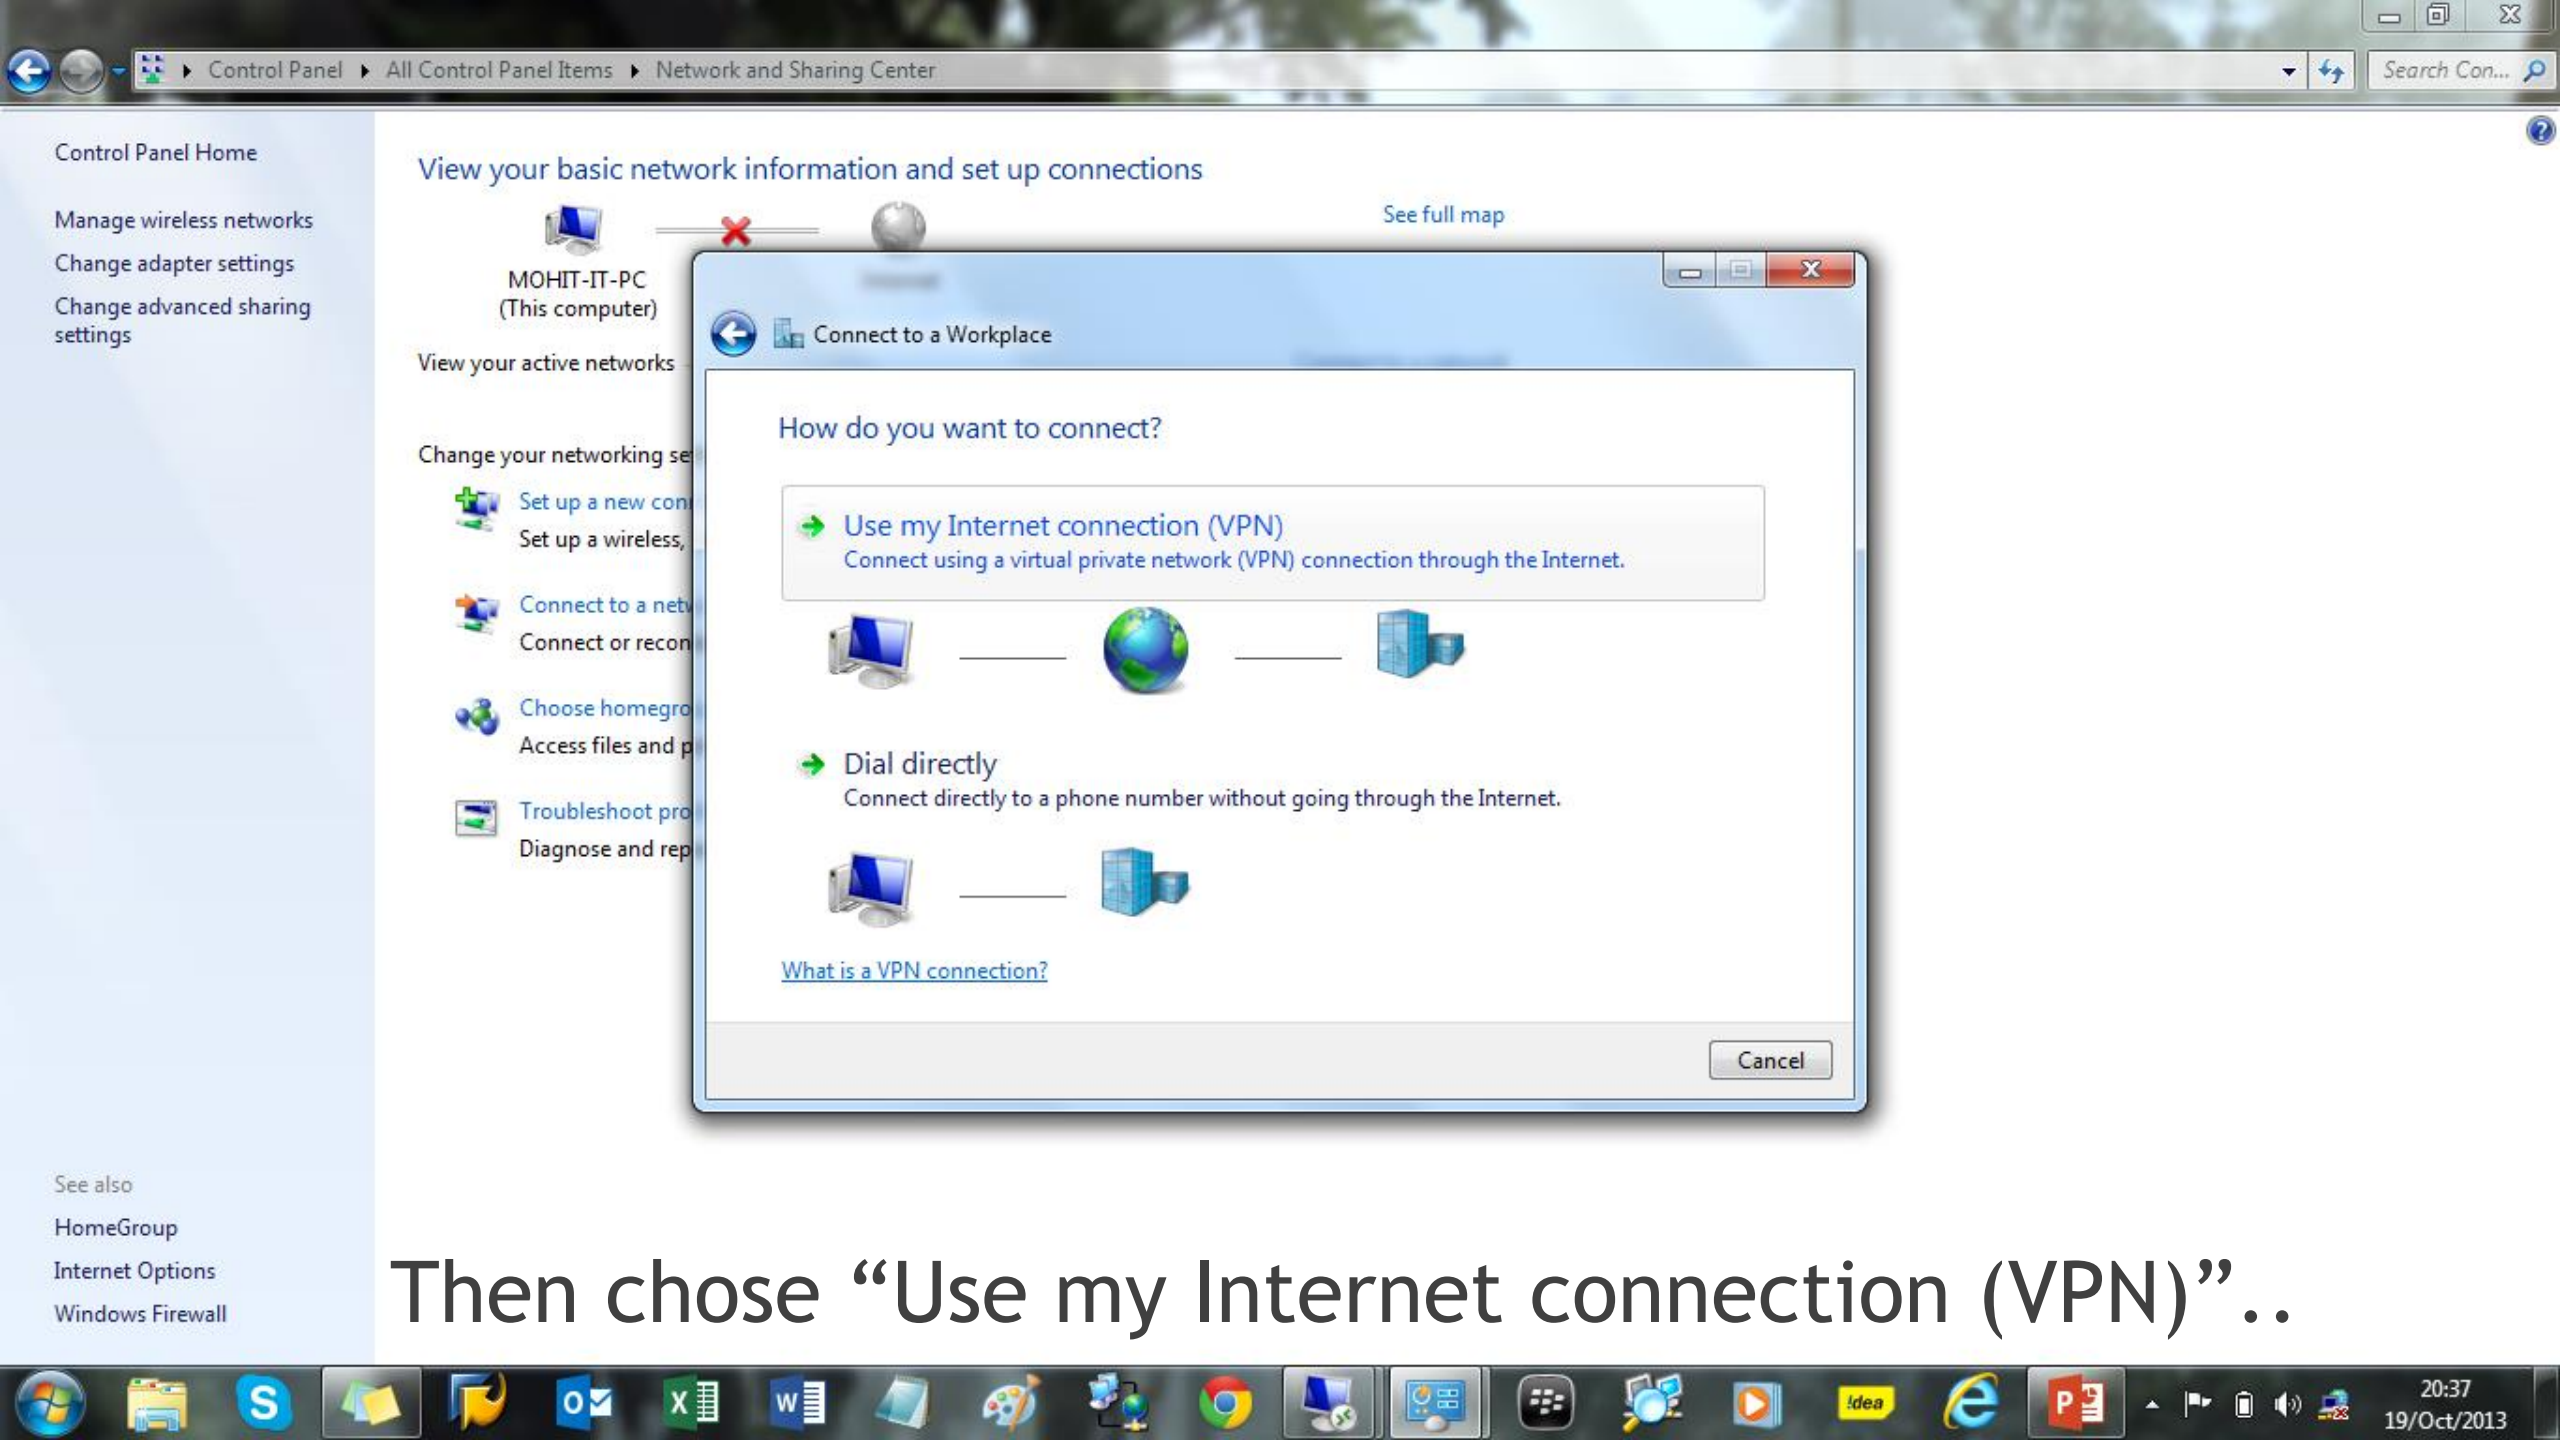

Then Setup a new connection or network..

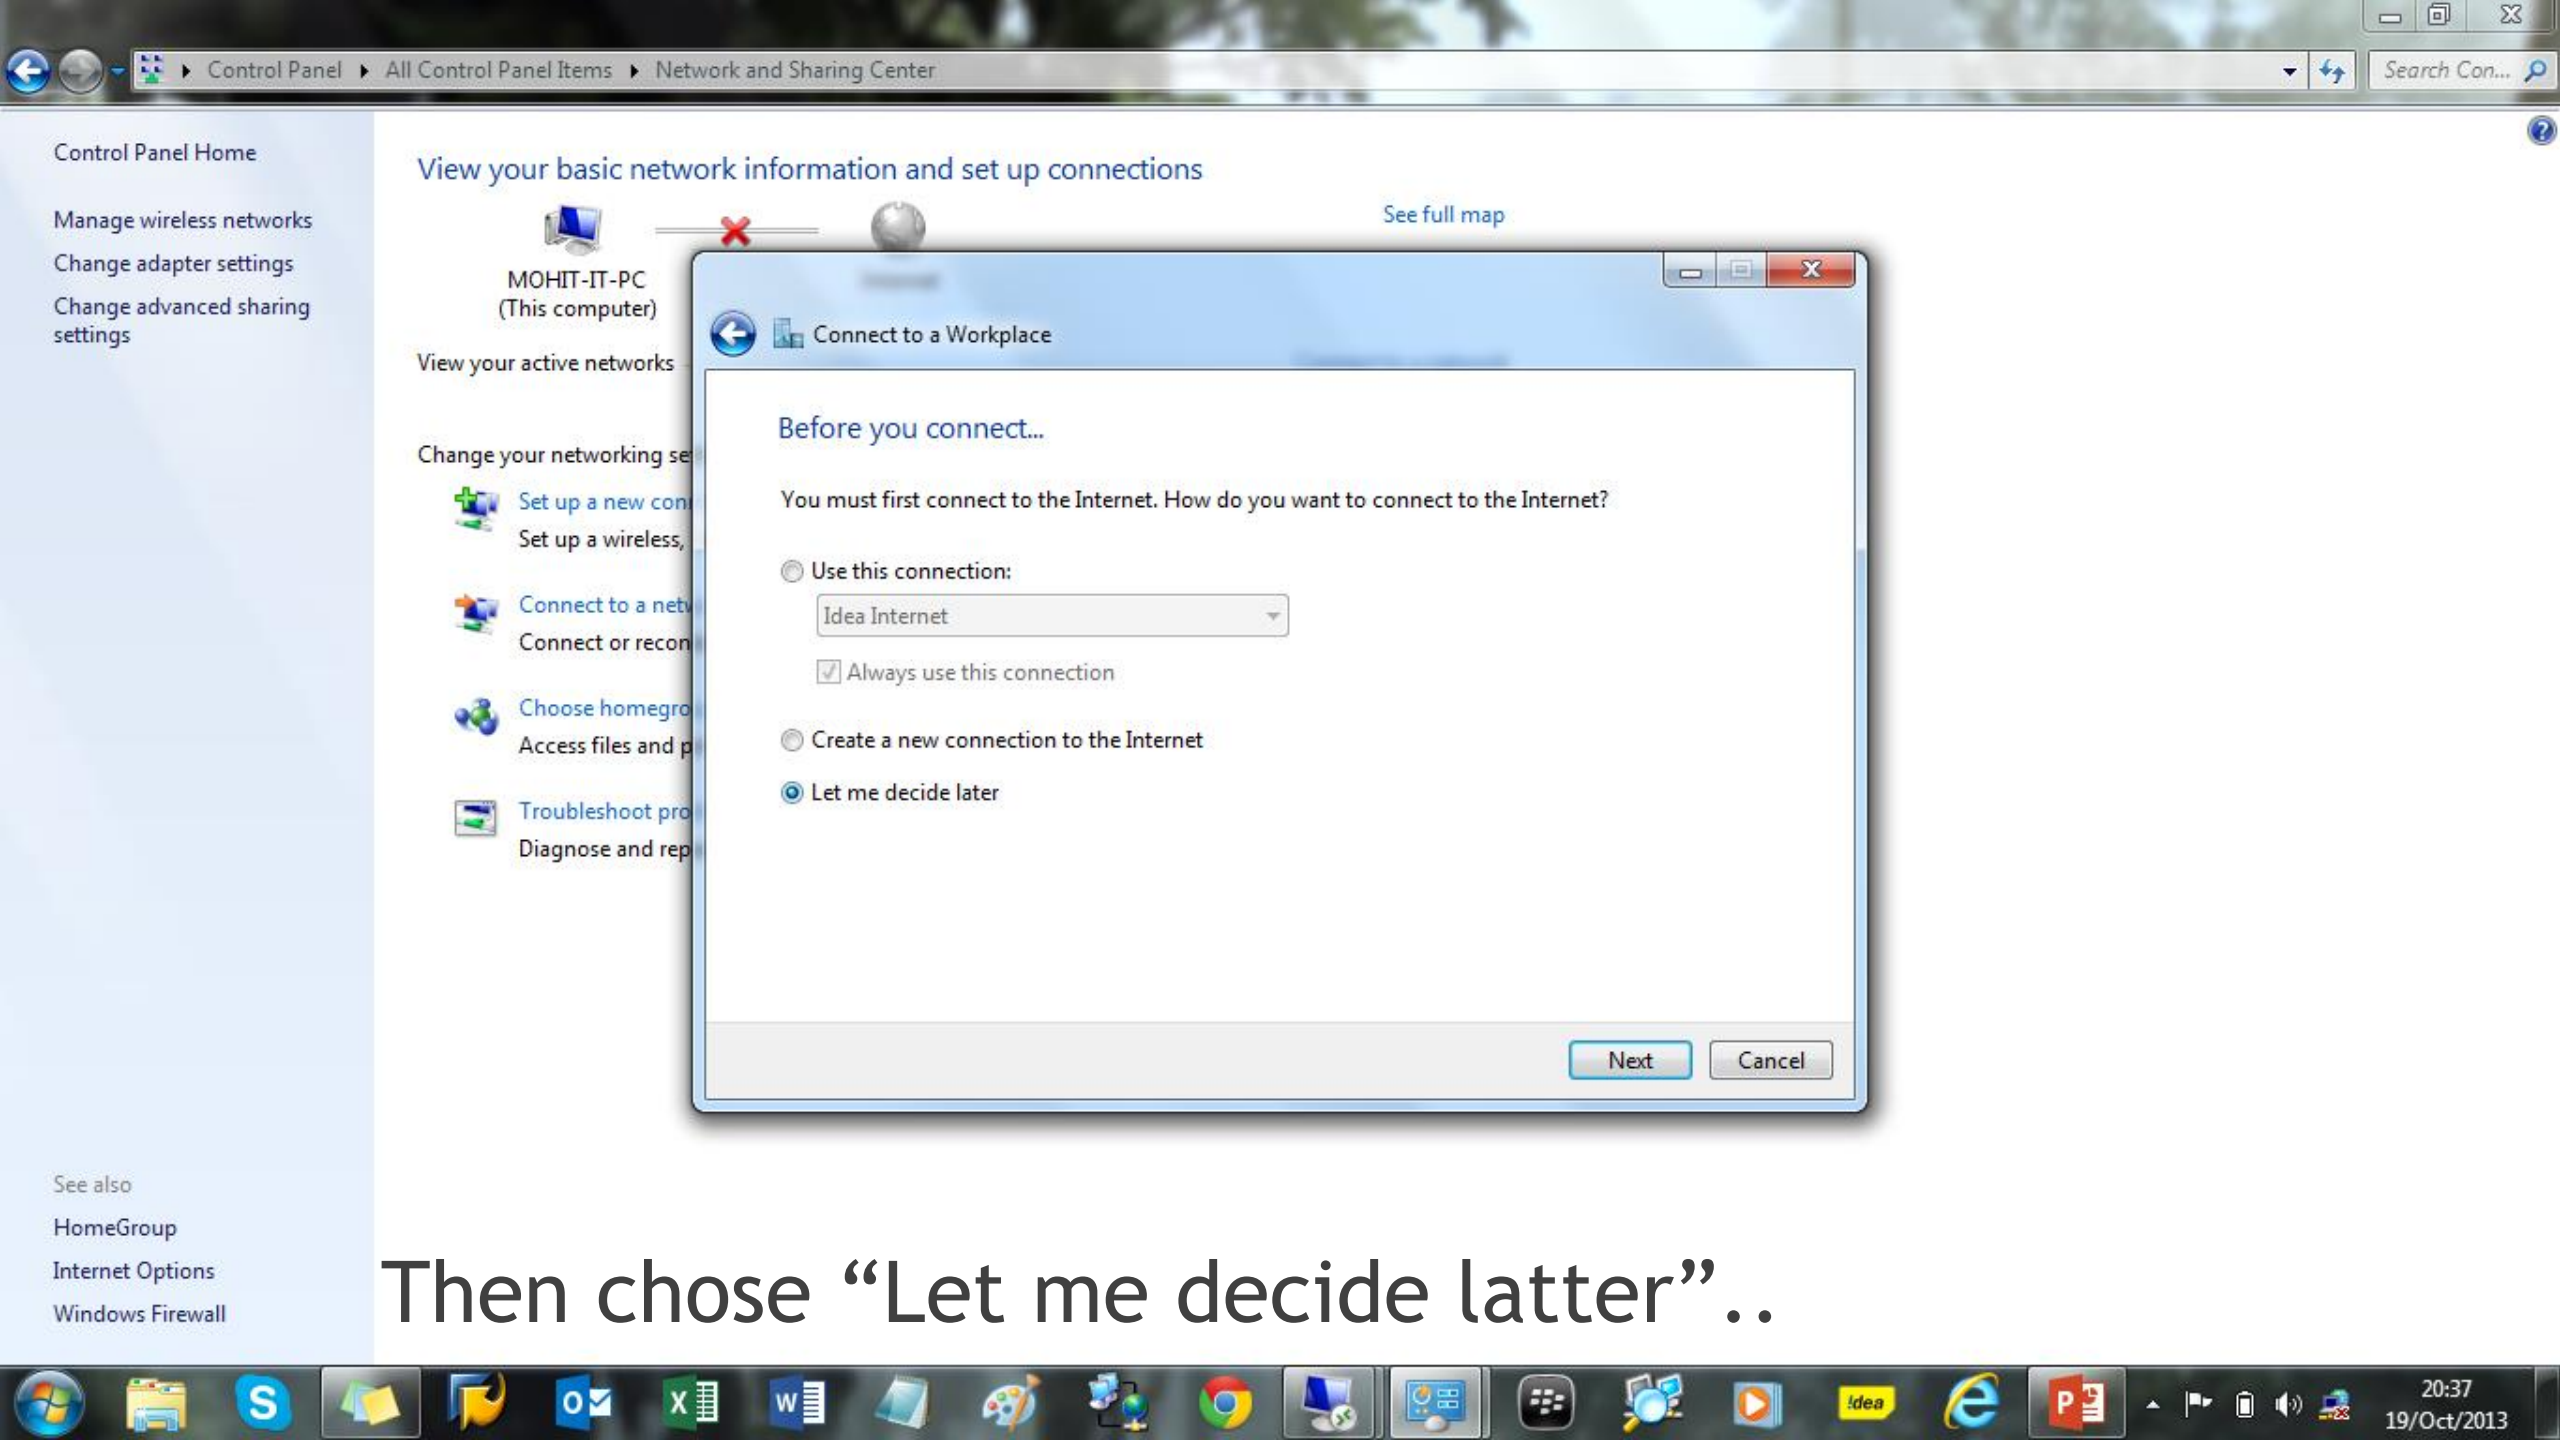

Then Connect to a workplace..

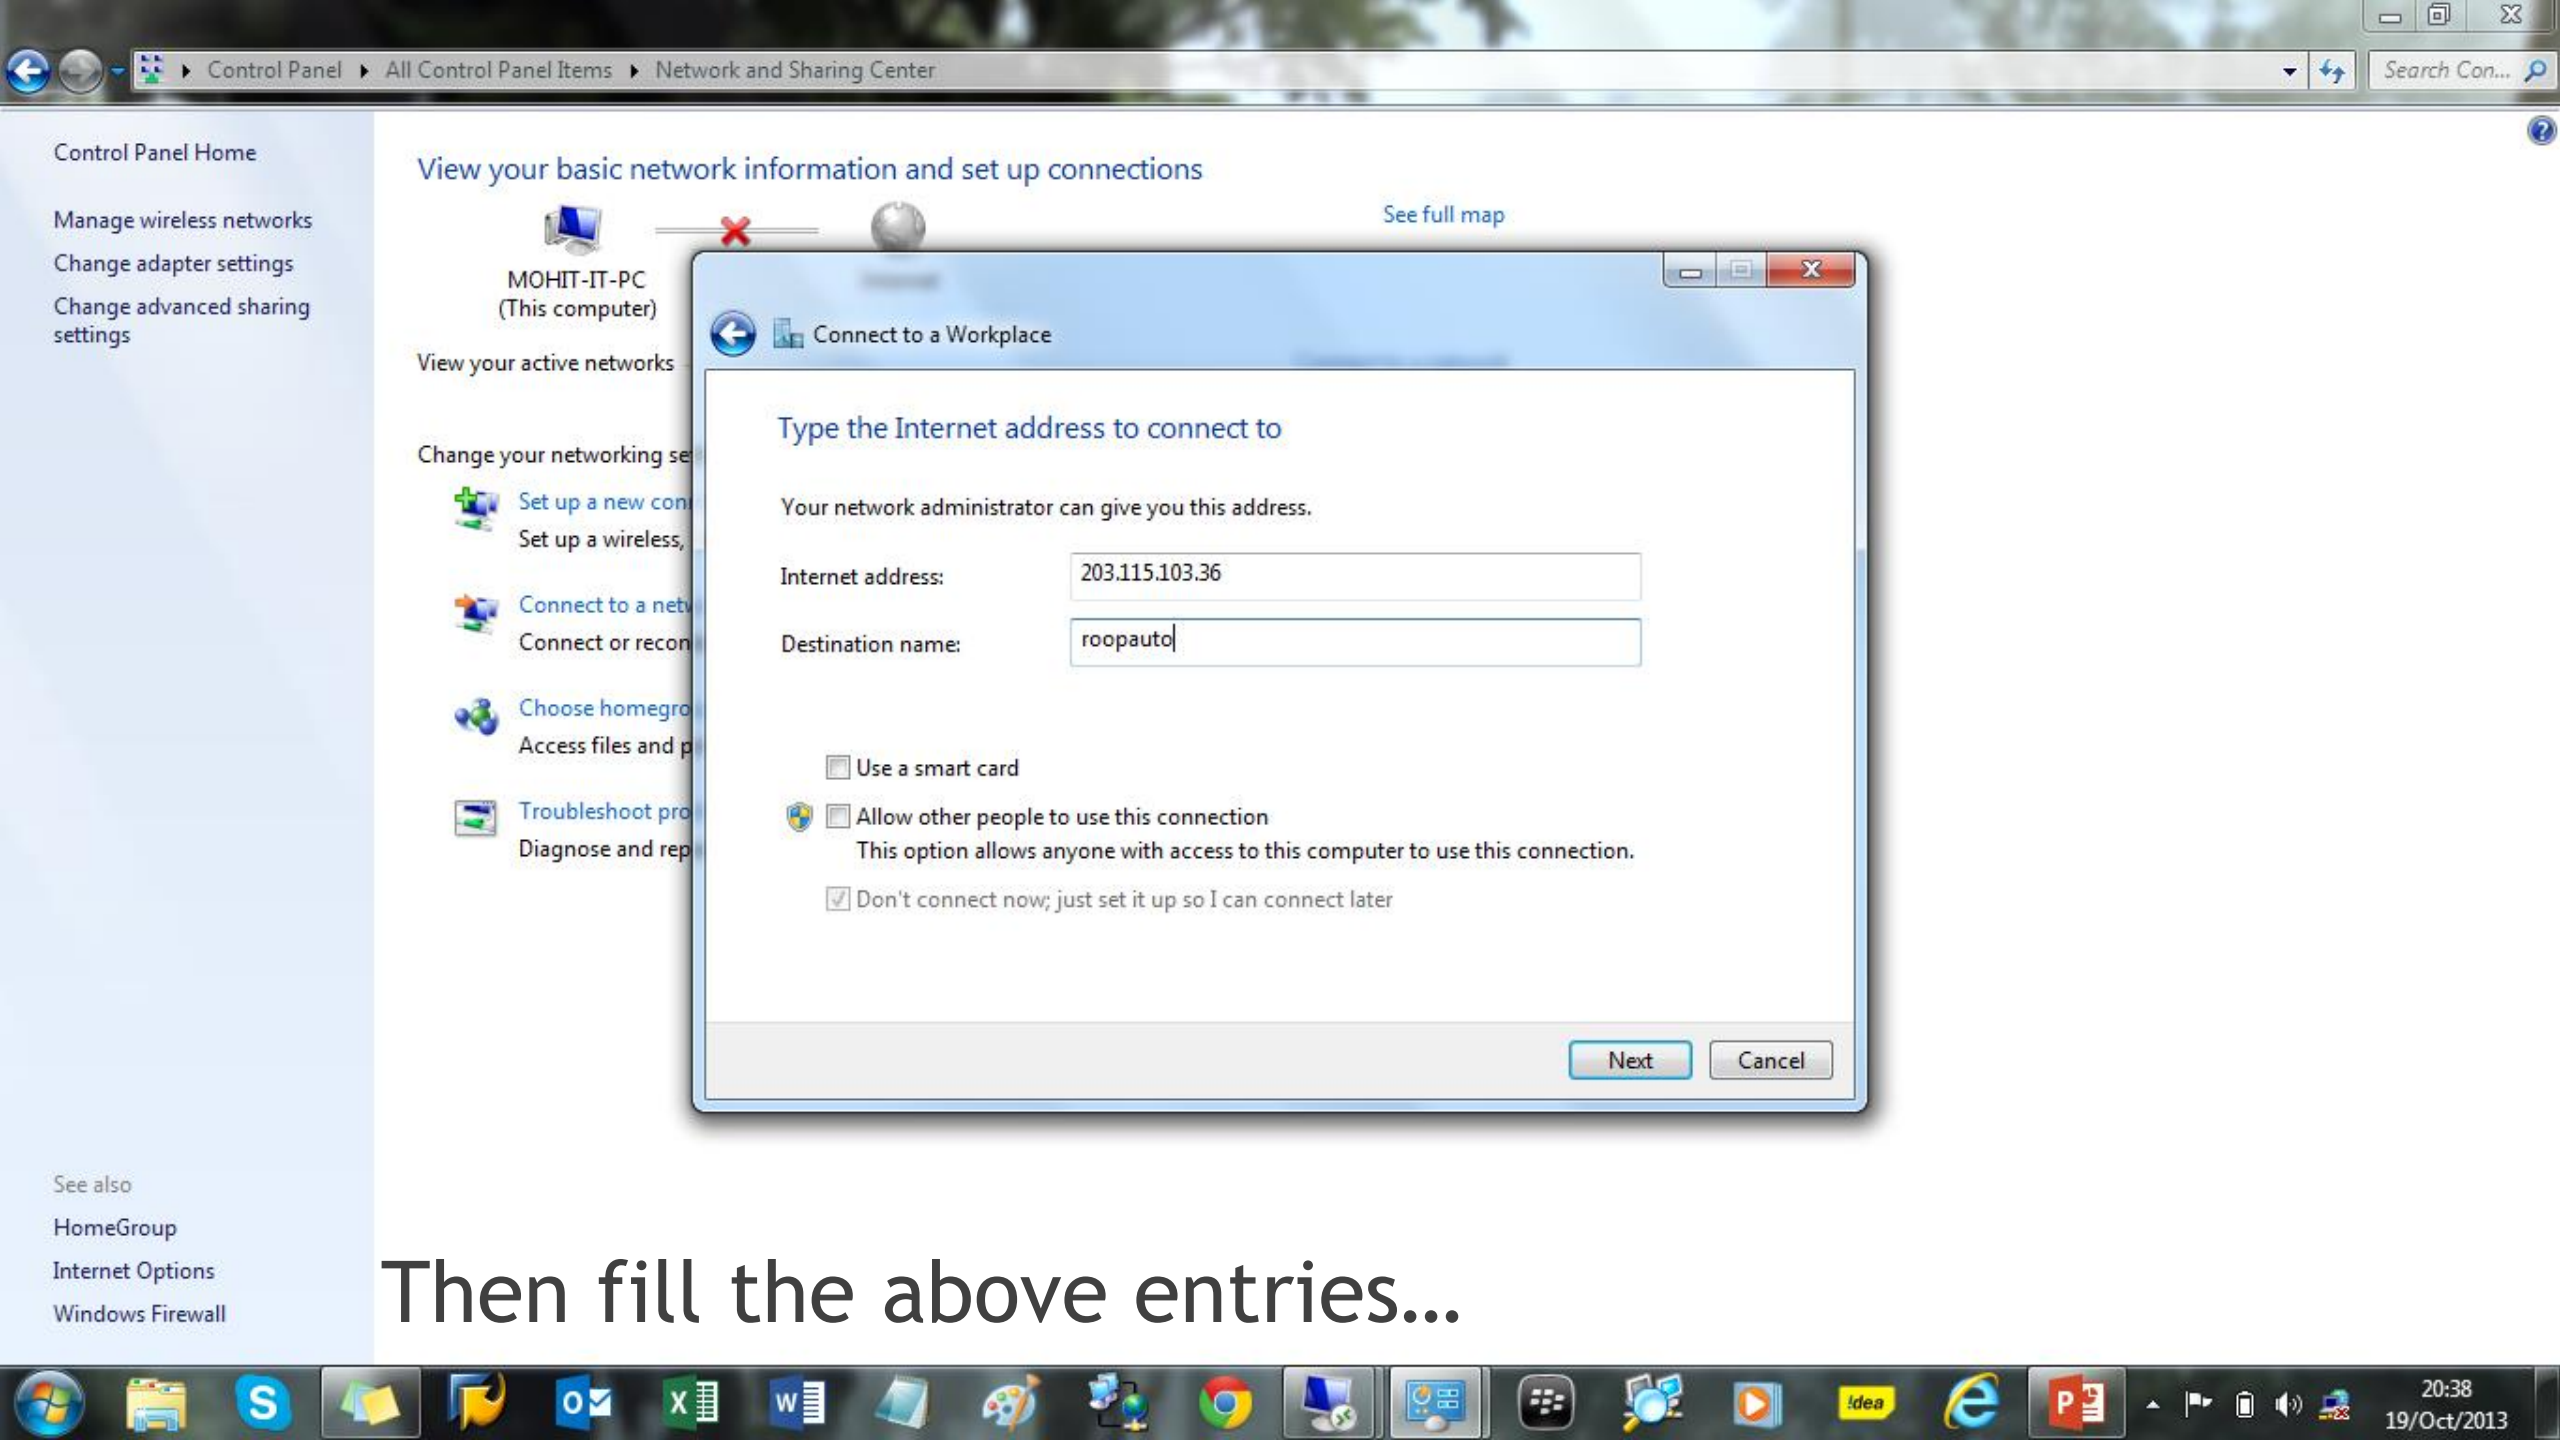

Then chose “No create a new connection”..

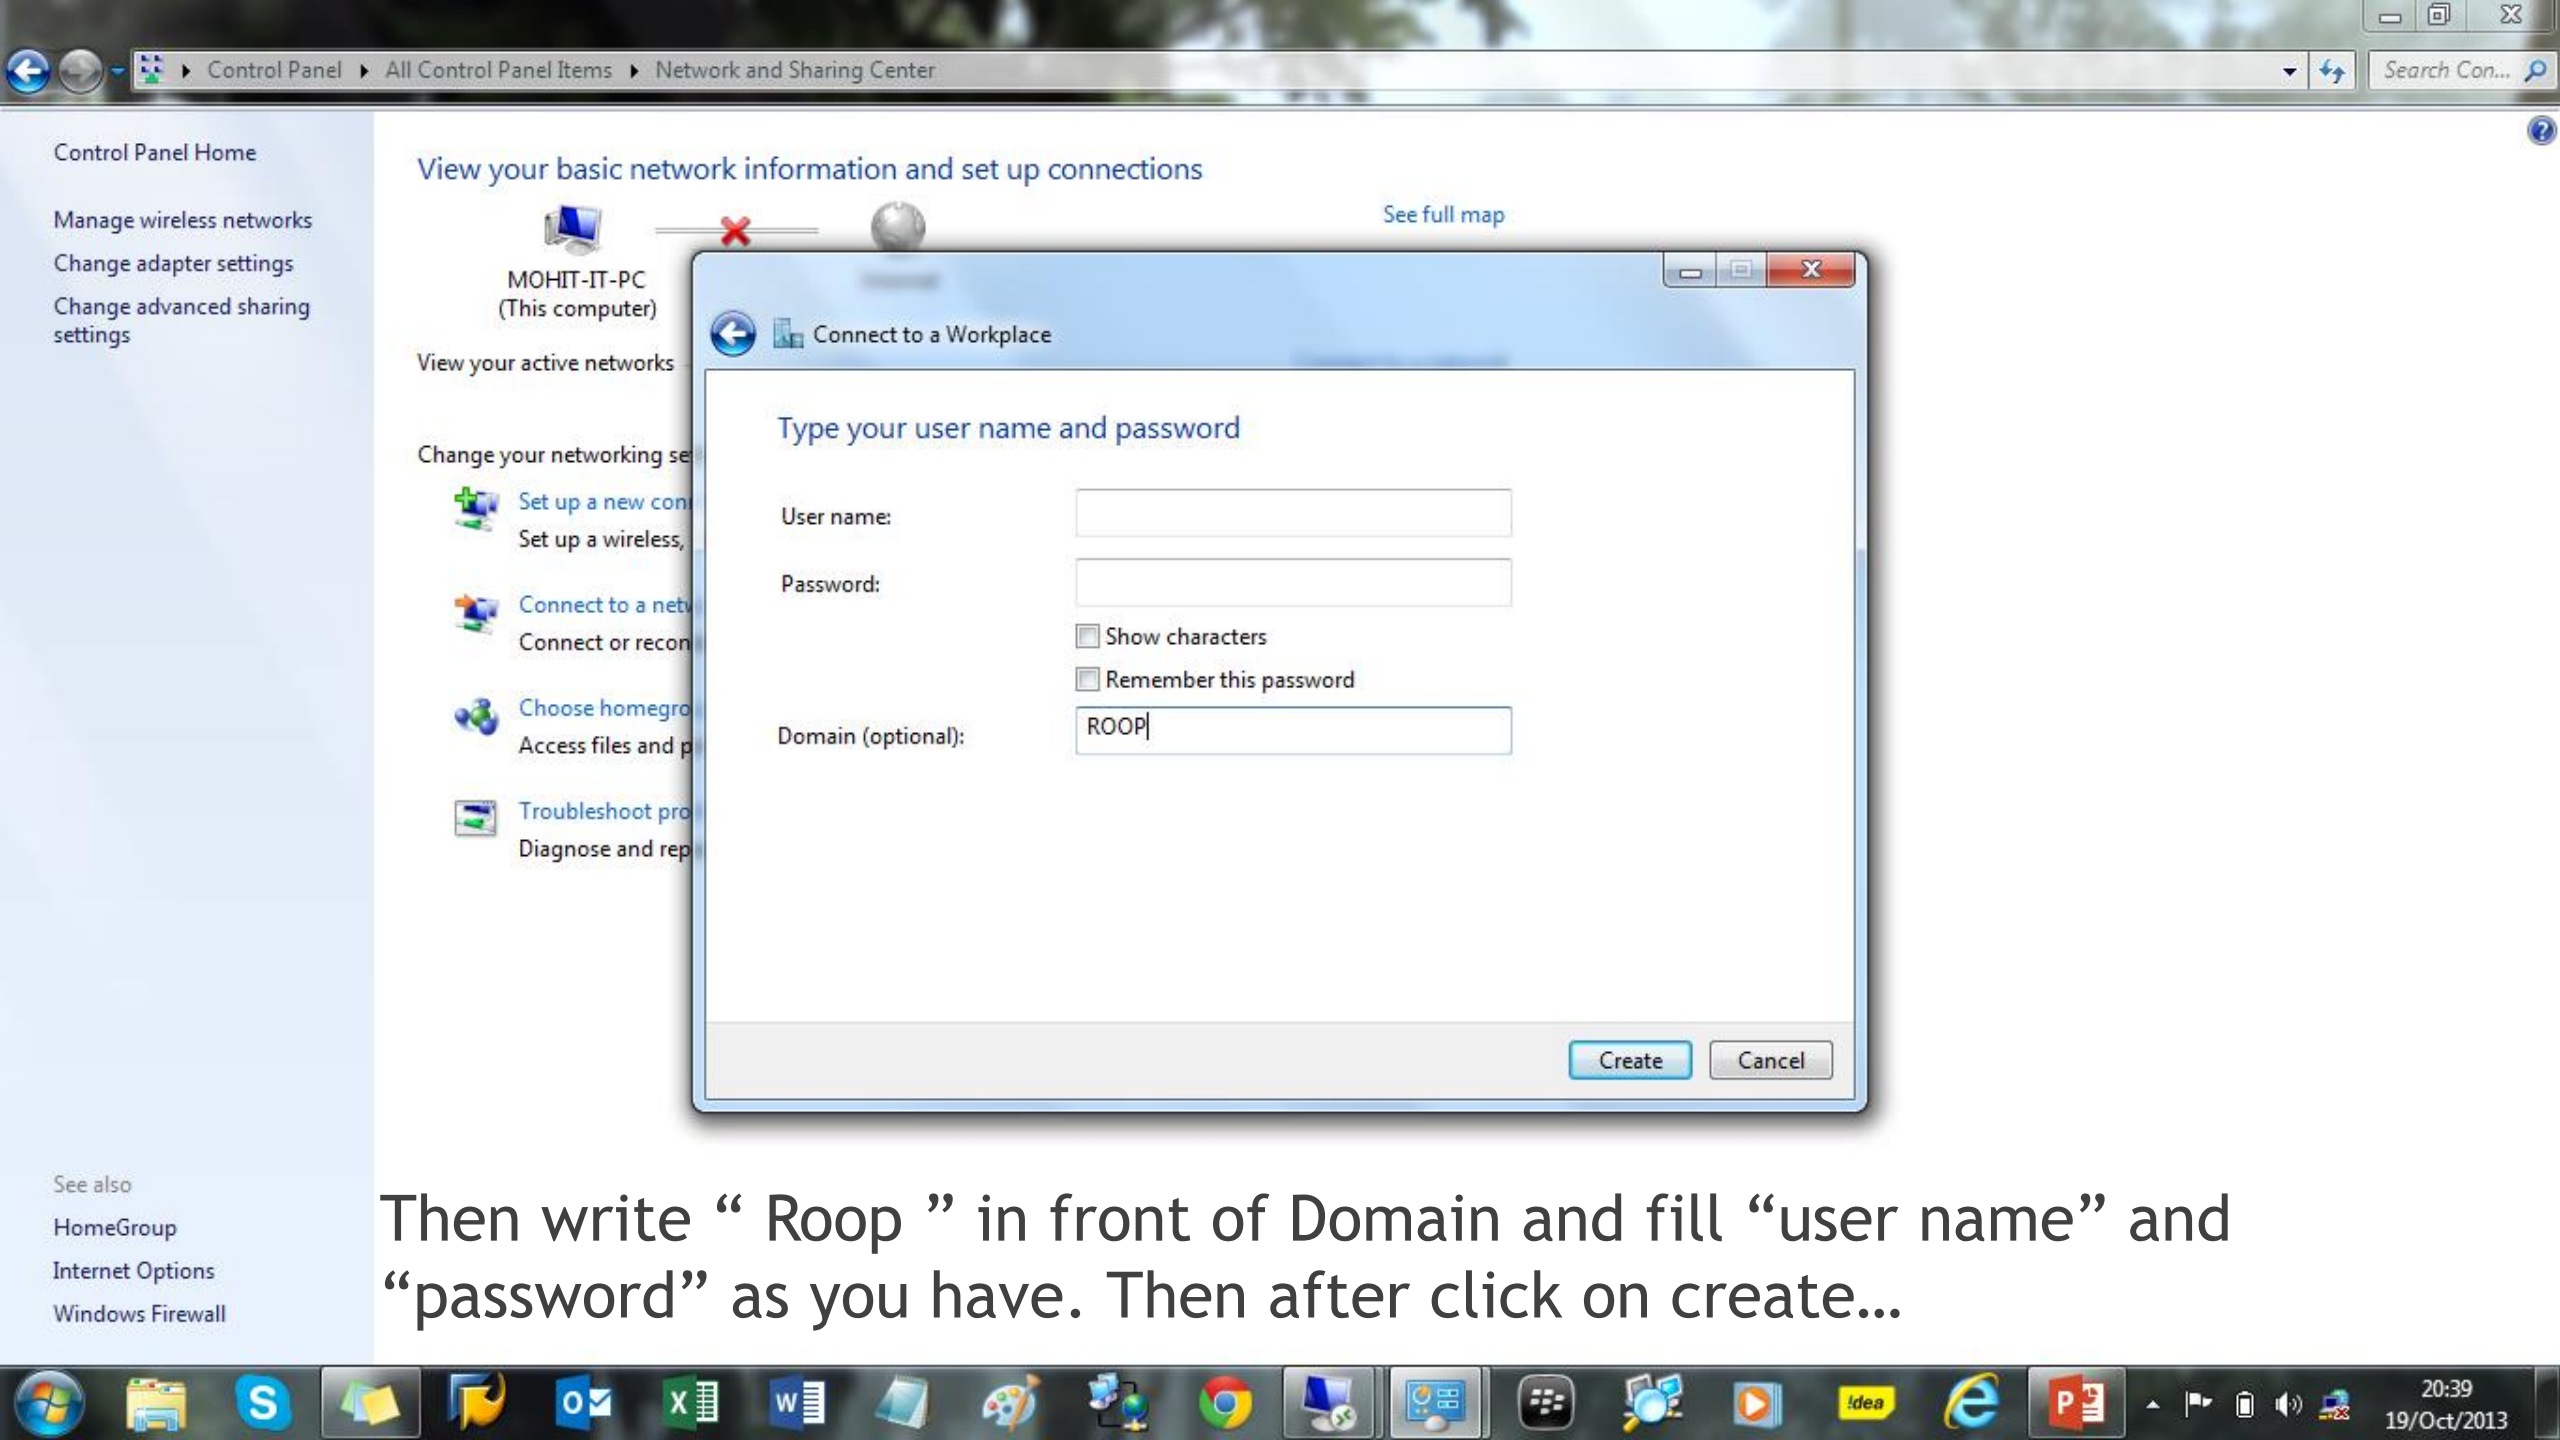

Then chose “Use my Internet connection (VPN)”..

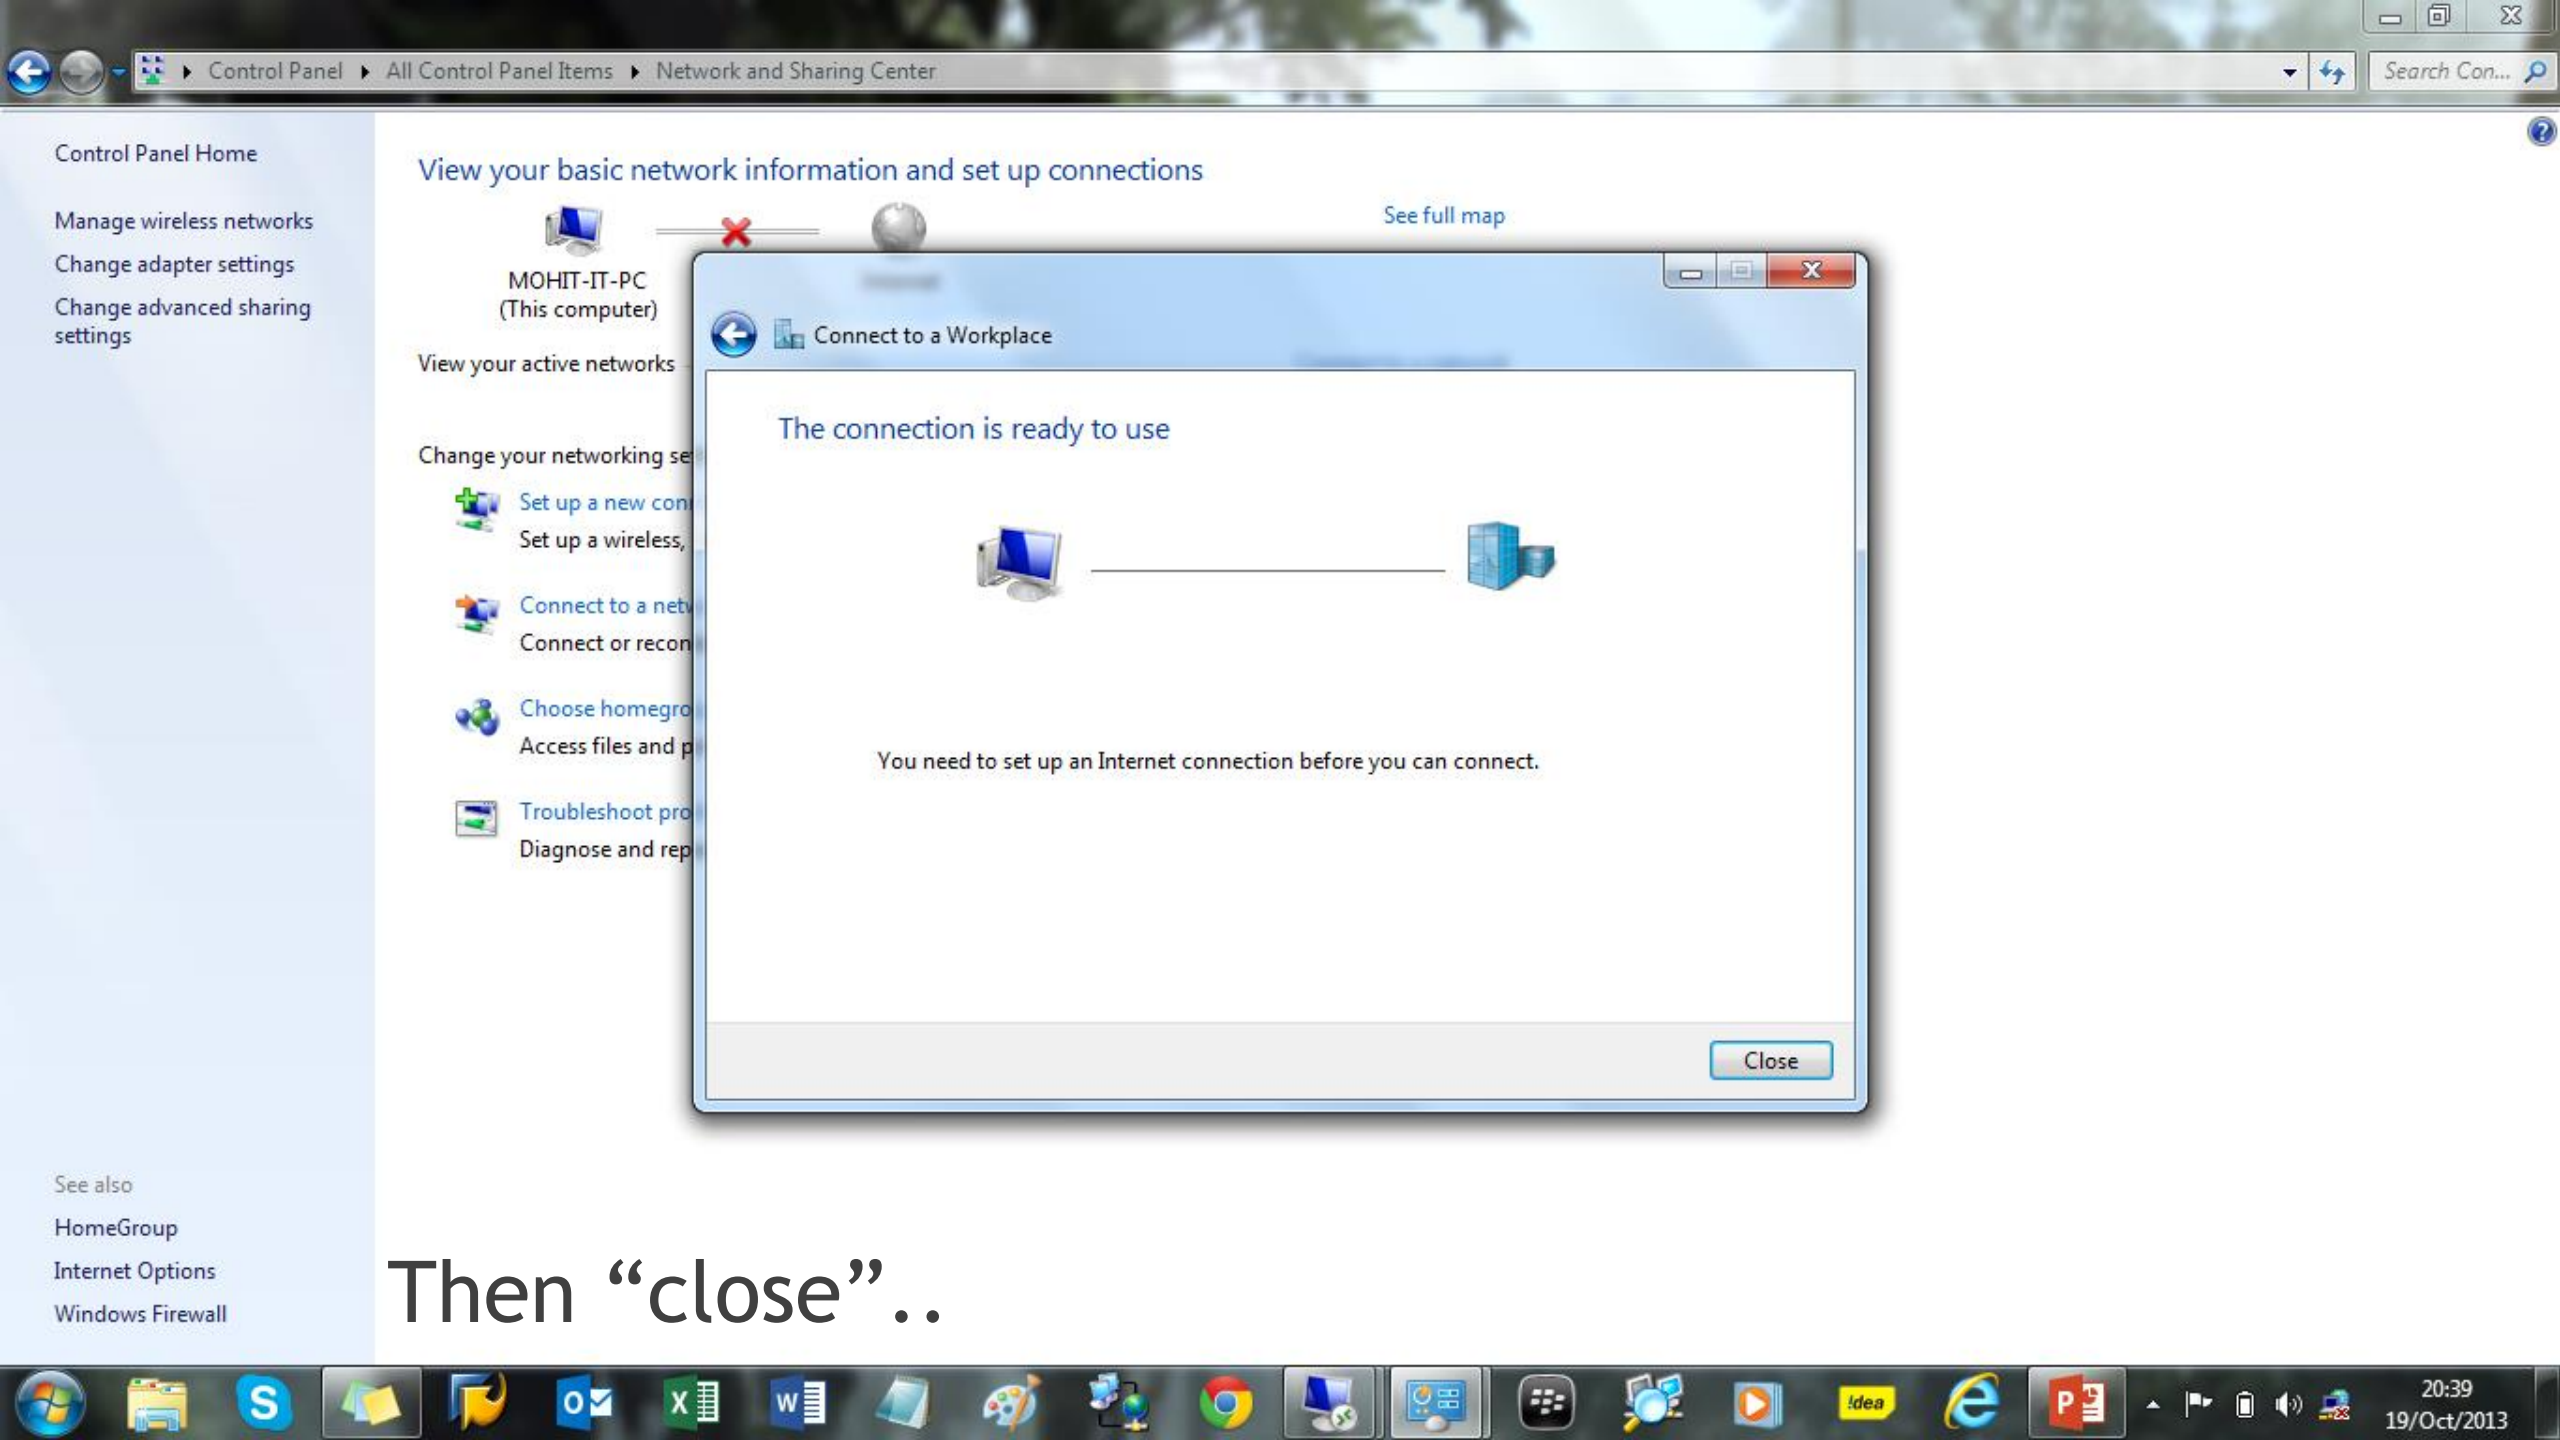

Then chose “Let me decide latter”..

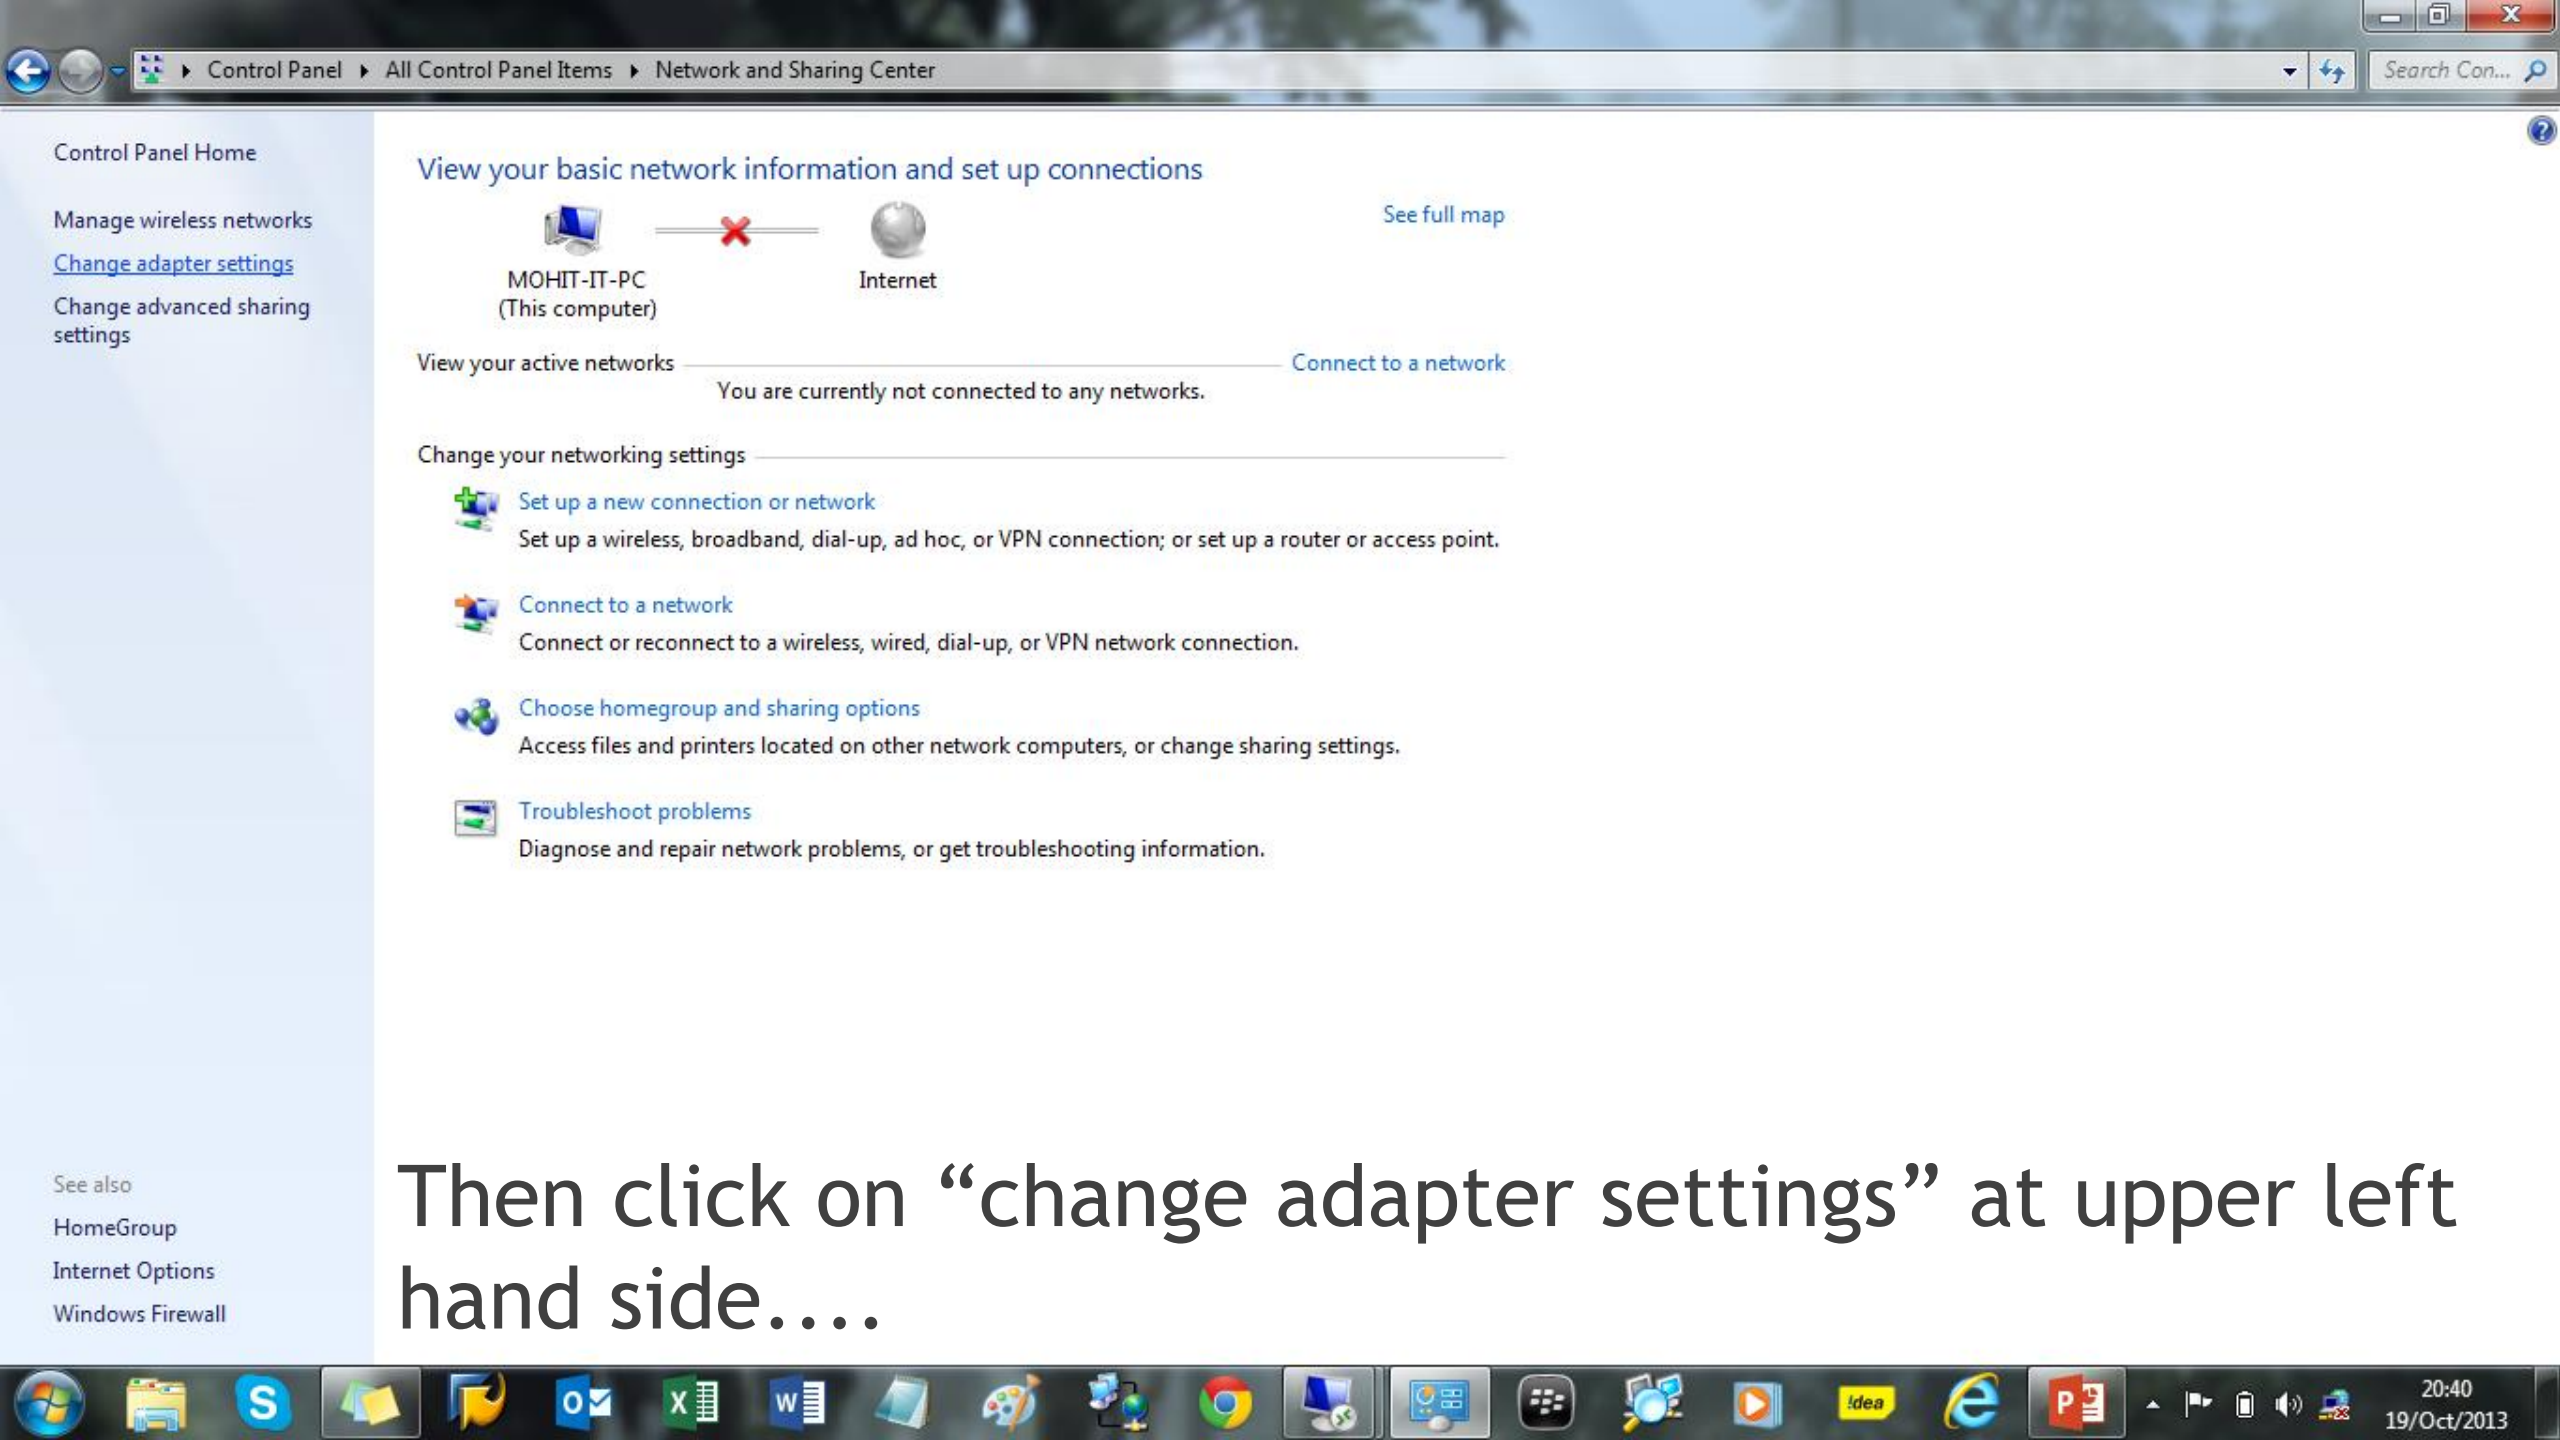

Then fill the above entries...

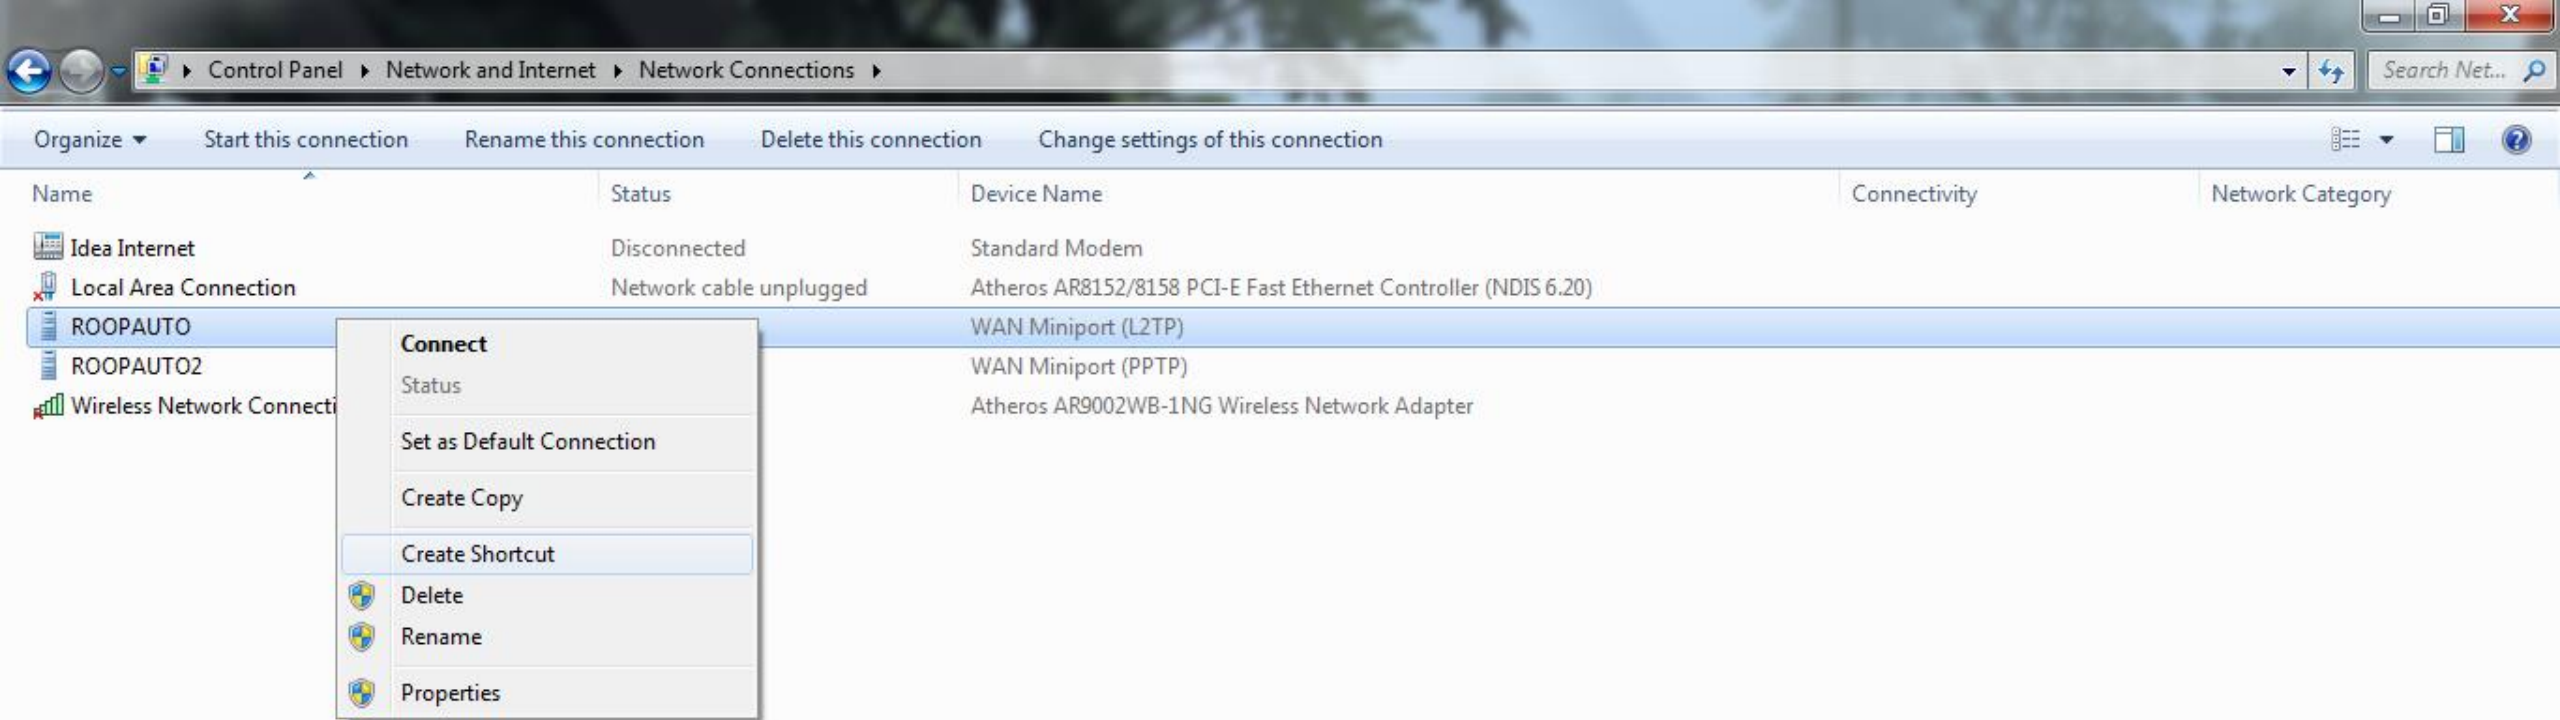

Then write “ Roop ” in front of Domain and fill “user name” and “password” as you have. Then after click on create...

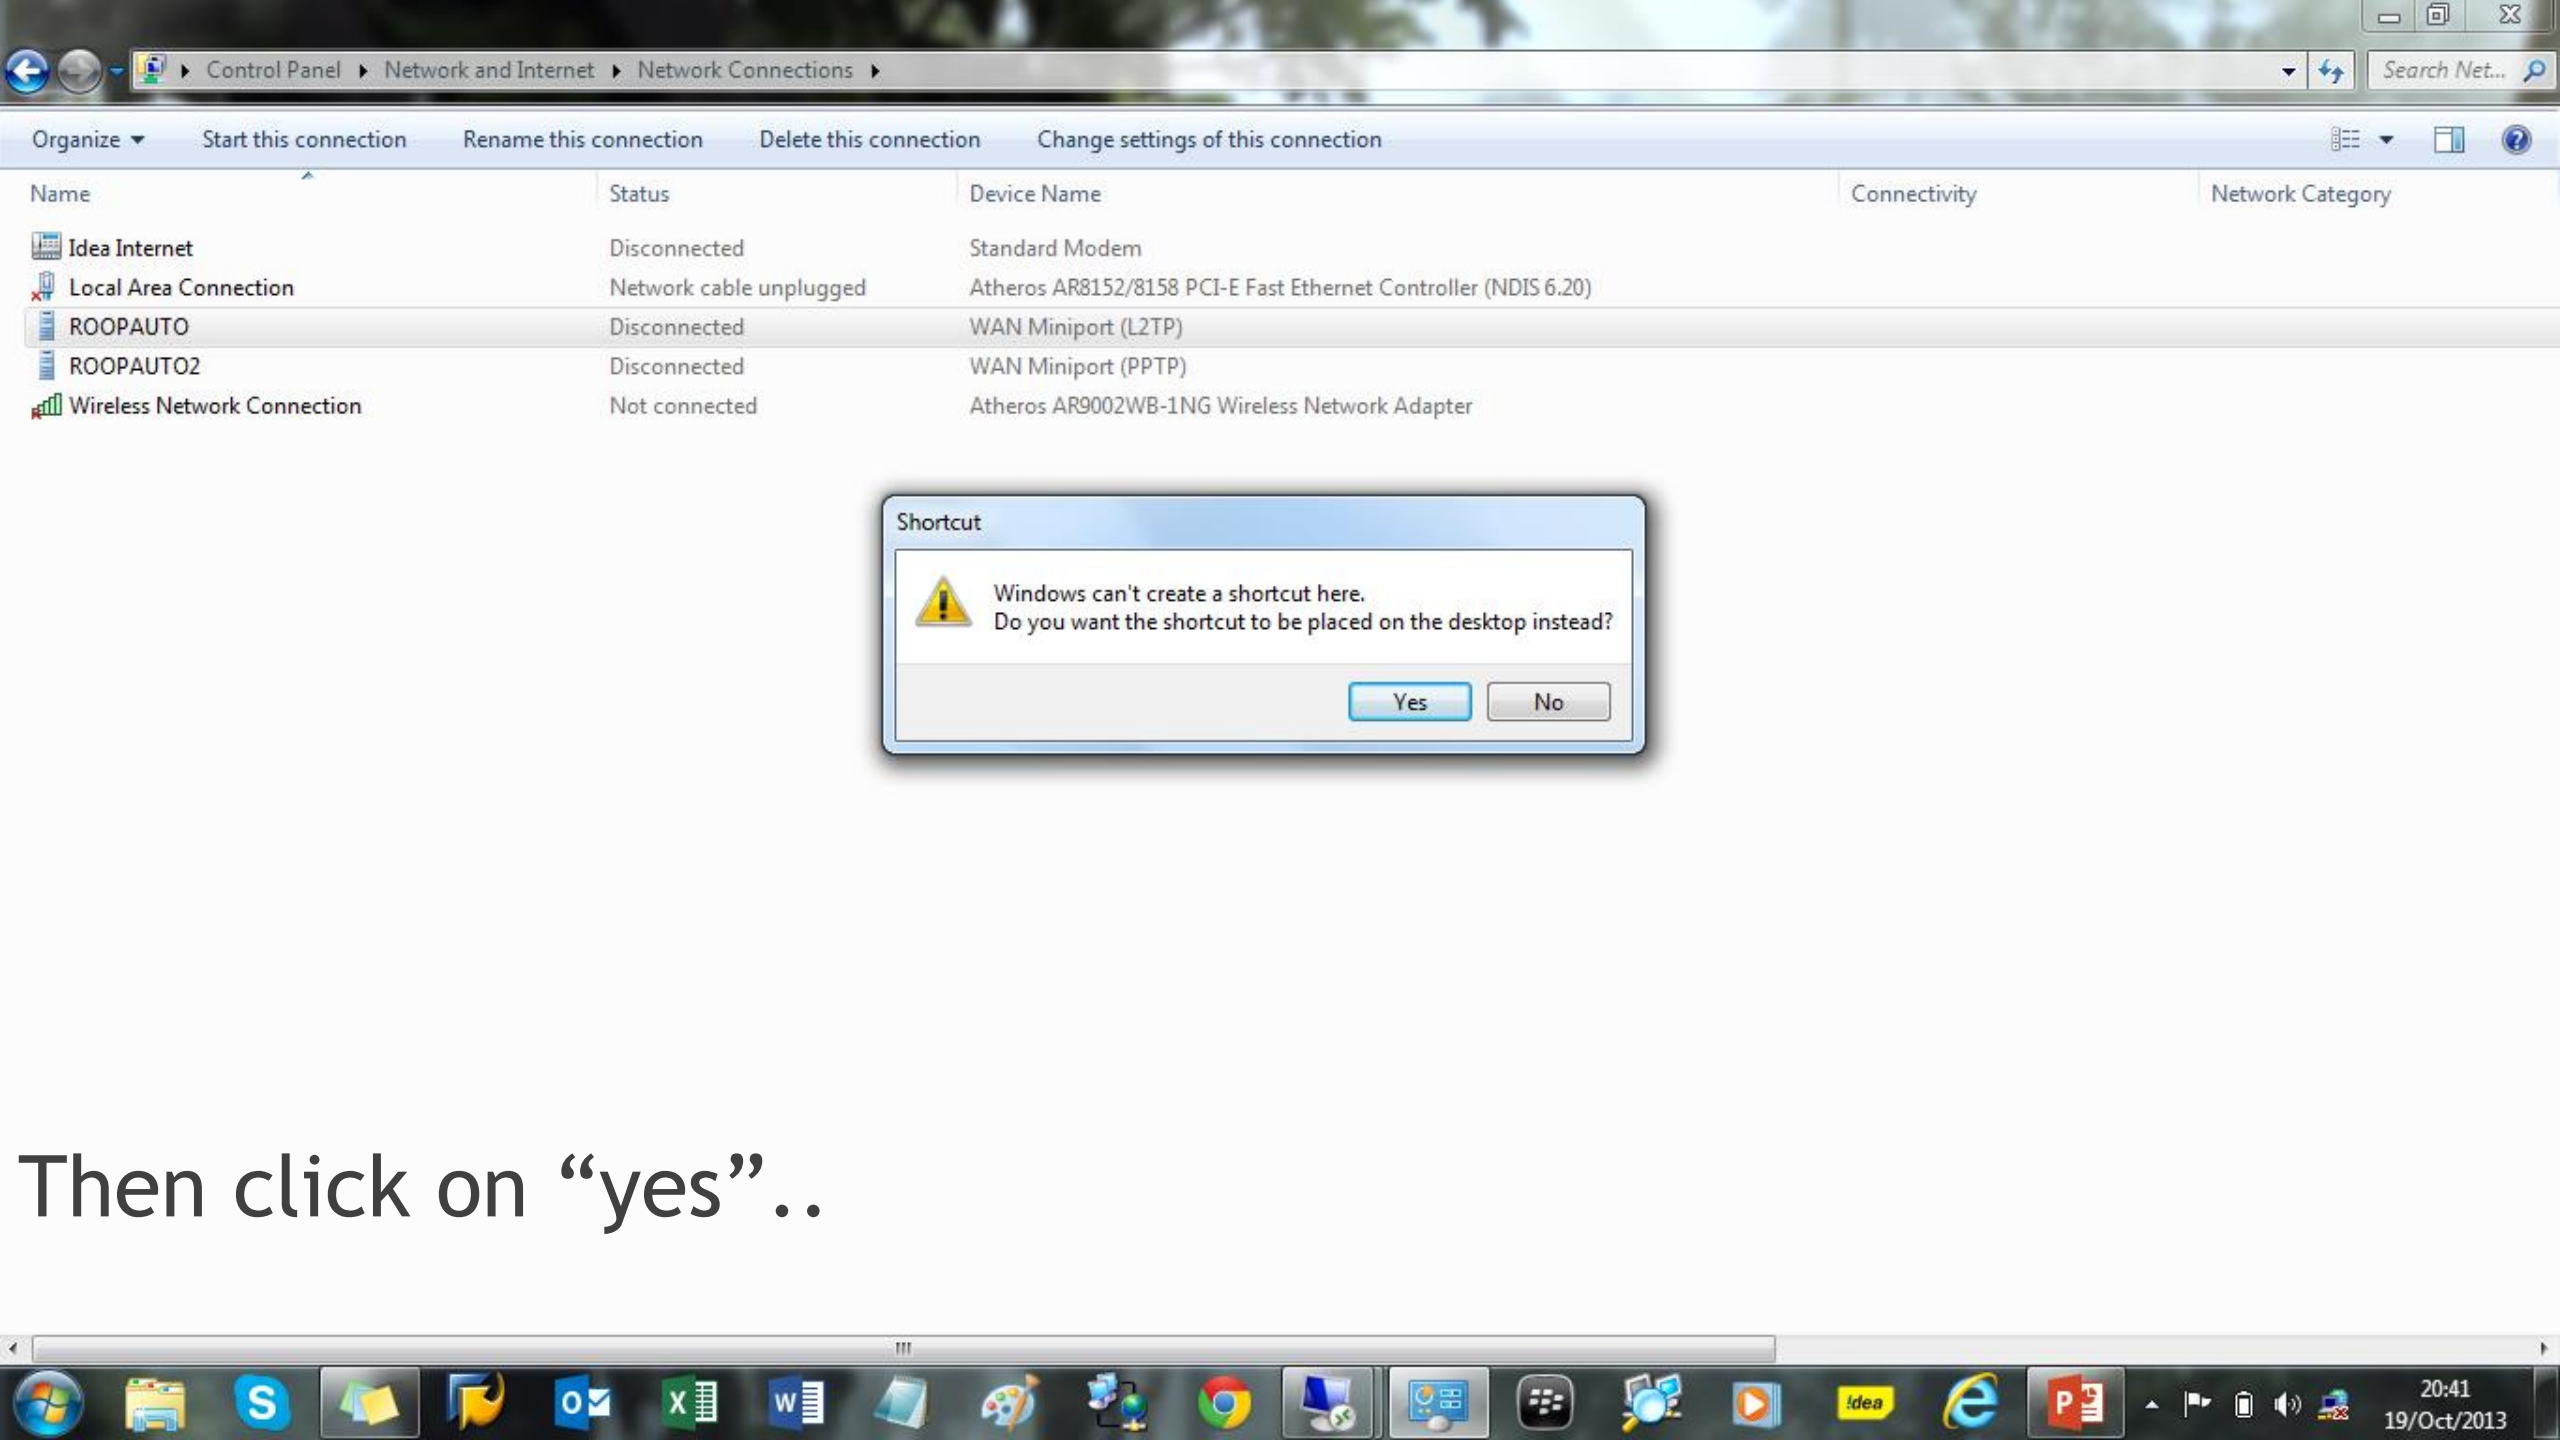

Then “close”..

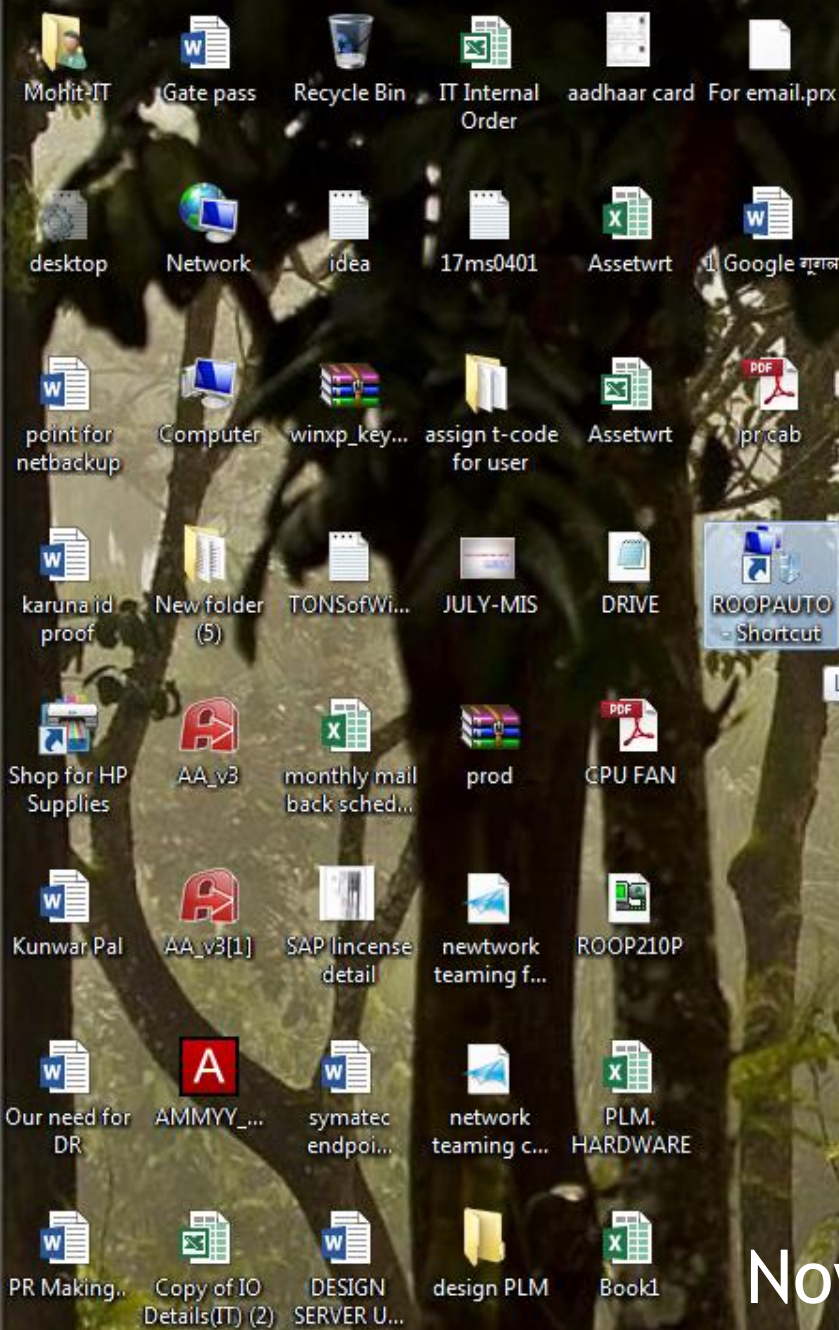

Then click on “change adapter settings” at upper left hand side....

Then right click on newly created dialup connection “Roopauto” and chose “create Shortcut”. It will create a shortcut for the same on your Desktop..

Then click on “yes”..

Now you can use the created shortcut for VPN dialing

Thank you...
